PROFESSIONAL SUMMARY

Full-stack developer and IT graduate with hands-on experience building and deploying production web applications — including a live student information system used by real school staff and a client-facing staffing platform. Comfortable across the stack with Next.js, TypeScript, Drizzle ORM, and PostgreSQL, with working knowledge of multi-role access control, payment integrations, and cloud deployment. Brings a strong creative-technical background from prior video editing, graphic design, and 3D visualization work, with proven adaptability across corporate and international production environments.

TECHNICAL SKILLS

Web Development: Next.js 15, React, TypeScript, JavaScript, RESTful APIs

Backend & Databases: Drizzle ORM, PostgreSQL, Django REST Framework, Laravel, Supabase

Cloud & DevOps: Vercel, Railway, Neon, AWS S3, Cloudflare R2, Git/GitHub

Integrations & AI Tools: PayMongo, HttpSMS, Gemini API, MediaPipe, Claude Code, Cursor

Creative & Multimedia: Video Editing & Post-Production, 3D Visualization & Rendering (SketchUp, Lumion), Graphic Design & Visual Branding, AI-Assisted Editing

FEATURED TECHNICAL PROJECTS

APIC SIS — Student Information System — *Next.js 15, TypeScript, Drizzle ORM, PostgreSQL (Neon)*

- Built and deployed a live, production student information system for Asia Pacific International College, in active use by school staff with real student data.
- Designed multi-role dashboards (owner, admin, registrar, cashiers, accounting) covering enrollment, cashiering, accounting, and exam permits.
- Led a full RBAC security audit and hardening pass, migrated the database to Neon, and authored the staff user guide.

Live: apic-sis.vercel.app

CAT College Online Enrollment and Payment System — *Next.js 15, PostgreSQL, PayMongo, AWS S3 / Cloudflare R2, HttpSMS*

- Primary capstone project: an 80+ page, 57-API-route enrollment and payment platform reaching a 9.0/10 health score.
- Implemented six role-based dashboards (student, registrar, cashier, faculty, accounting, admin), online payments, prerequisite enforcement, waitlist promotion, and certificate generation.
- Produced full supporting capstone documentation, including UML class and use-case diagrams.

PurlyRemote LLC — Staffing Platform Website — *Next.js 15, Supabase Auth*

- Delivered a client website for a remote staffing platform with multi-role dashboards, real-time chat, and an AI chatbot matching system.

Live: purlyremote.net

J&A Fitness AI — *React 19 (Vite), Django REST Framework, PostgreSQL, Gemini API, MediaPipe*

- Built a progressive web app for a Legazpi City gym with AI-driven exercise analysis and rep counting.
- Deployed the frontend on Vercel and the backend on Railway.

WORK EXPERIENCE

Video Editor | Airflix Company & Maxwell Achieves *Post-graduation*

- Edited digital video content for online and media platforms across a multicultural, international production team.
- Used AI-powered tools for video enhancement, auto-captioning, background cleanup, and scene enhancement to improve editing efficiency.

Video Editor & Graphic Designer (Part-Time) | ADC Company *1st – 2nd Year*

- Produced promotional and corporate video content and designed marketing and branding materials.
- Created detailed 3D golf course visualizations from real-world layouts using SketchUp, and rendered walkthroughs in Lumion.
- Filmed on-site at actual golf courses and integrated real footage with 3D visuals to enhance storytelling.

EDUCATION

BS Information Technology | Computer Arts and Technological College (CAT College), Legazpi City

BS Computer Science | Arellano University — Jose Abad Santos Campus, Manila *Completed 1st–2nd Year*

ADDITIONAL ACADEMIC PROJECTS

Water Refilling Station Management System — POS and inventory system (Laravel, React) with authentication and reporting.

Online Appointment Scheduling System — web-based scheduling platform with chatbot integration.

ADDITIONAL SKILLS

Creative Problem-Solving • Time Management • Team Collaboration • Adaptability • Cross-Cultural Communication
